Delivery over time

Estimated daily plays across all 25 screens from Jul 2 to Sep 2, 2026, the run of the final spot.
Weekend days are shaded.

DAYS ON AIR 63 Jul 2 – Sep 2	AVERAGE DAY 1,098 plays per day	BEST SINGLE DAY 1,141 Wednesday, August 19	PLAYS IN PERIOD 69,168 final spot, all screens
---	--	---	---

Weekdays 45 days		49,401 1,098 / day
Weekends 18 days		19,767 1,098 / day
Host screens loop the spot seven days a week, so a weekend day delivers about the same as a weekday. Weekdays total more simply because there are more of them.		

How this is estimated: MCTV player exports list total plays per screen with first and last play dates, not day-by-day counts. Each screen's plays are spread evenly across its active days (a day when a spot switched or a screen stopped counts as half). Rises and dips reflect screens joining or leaving the rotation. Sept 3 is left off because the export was pulled that morning.
